

Reč gostujućeg urednika / A word from the guest editor

Poštovani čitaoci, drage kolege i saradnici,

Čast mi je i neizmjereno zadovoljstvo obratiti Vam se u ulozi jednog od gostujućih urednika časopisa Sanamed. Publikovanjem radova iz različitih oblasti kliničke i preventivne medicine, časopis Sanamed želi i uspijeva da približi najnovije tekovine savremene medicine ljekarima i svim prijateljima medicine. Ujedno, časopis daje podstrek ljekarima, za publikovanje stručnih i naučnih radova i podstiče istraživački duh mladih ljekara što se od jednog znanstvenog časopisa i očekuje, a što ujedno njegovom uredništvu čini veliko zadovoljstvo i daje motiva za dalji rad.

Posebno treba naglasiti da se časopis distribuira u zemlji i u inostranstvu, pa smo tako i mi u Bosni i Hercegovini uz sve ljude dobre volje koji pomažu opstanak ovog časopisima u ovim nesigurnim vremenima.

Dio materijala koji smo ovdje iznijeli iz kazuistike je dječije i perinatalne patologije Univerzitetsko kliničkog centra u Tuzli. Riječ je o svakodnevnim stručnim problemima vezanim za dječju dob i probleme organizacije zdravstvene zaštite s kojim se susrećemo svakodnevno. Svakom radu autori su pristupili stručno i znanstveno, s ciljem da obrađeni materijal bude dostojan časopisa.

Poštovani čitaoci, drage kolege i saradnici pred nama je novi broj Sanameda u kojem vam pored naučnih i stručnih članaka donosimo i novitete iz medicine. Svakako da nas raduje štampanje ovog, ali i svih narednih brojeva.

Do narednog broja,
Vaša

Prof. dr Fahrija Skokić
Pedijatar neonatolog
Pomoćnik direktora za medicinska pitanja UKC Tuzla
Šef Katedre za Pedijatriju Medicinskog fakulteta
Univerziteta u Tuzli
Bosna i Hercegovina

* * *

Dear readers, colleagues and associates,

It is my honour and immense pleasure to address You in a role of one of the guest editors of the journal Sanamed. By publishing of papers from different areas of clinical and preventive medicine, journal Sanamed wants and manages to bring the newest achievements of modern medicine to doctors and all friends of medicine. At the same time, the journal gives doctors an incentive

for publishing of scientific papers and encourages exploratory spirit of young doctors, which is expected from one scientific journal, and what also gives its editorship a great pleasure and motivation for further work.

It is especially necessary to stress out that the journal is distributed in country and abroad, so we in Bosnia and Herzegovina are with all the good people who help the survival of this journal in these unsecured times.

Part of the material presented here is taken from casuistry of child and perinatal pathology at the University clinical centre in Tuzla. The matter is about everyday professional issues related to the children's age and issues of health care organization, which we encounter every day. Each paper, the authors have approached professionally and scientifically, for the sake of value of the processed material.

Dear readers, dear colleagues and co-workers, in front of us is the new issue of Sanamed where next to the scientific articles we bring also innovations from the world of medicine. Certainly we are glad about printing of this, and all next issues.

Until the next issue,
Your,

Prof. dr Fahrija Skokić
Paediatrician neonatologist
Assistant to the director for medicine matters
University Clinical Centre Tuzla
Head of the Department for Paediatrics
at the Faculty of Medicine, University of Tuzla
